

Are you ready for flash reprogramming?

Pass Thru Pro II brings OEM-level flash reprogramming to the independent shop

EETA113B – Pass Thru Pro
J2534 Flash Reprogramming
Device

WARNING

Read additional safety
precautions on pages 534 to
537 in product catalog CAT1000

**See Page Two
for Application Schematic**

EU - Unavailable

- Certified SAE J2534 Pass-Thru Device updates the software/firmware in vehicle electronic control units (ECUs) with software directly from the OEM
- Fix software-controlled drivability & emission issues, program new ECUs
- Pass Thru Pro II can program emission-related ECUs on any J2534-compliant vehicle (Required compliance for 2004-later autos)
- Additional Requirements: Data subscription through OEM; Control device such as VERUS™ or a PC; Internet access
- Includes: Programming interface, Software support CD, 6' USB PC-interface cable, 6' vehicle interface cable, Instruction manual
- Easier than ever – go to www.passthru.pro.snapon.com for firmware/driver updates and links to OEM websites for downloads
- NOTE: A stable vehicle power supply is critical to protect the vehicle ECU during programming. The Snap-on EECS306BKR D-TAC Plus and the Snap-on EEBC500 Battery Charger Plus (available 9/08) are well-suited to this purpose. Both feature an automatic power supply function especially for vehicle reprogramming
